Sprint 3 Retrospective Summary

What worked well this sprint that we want to continue doing?

Each member of our team had their own tasks to accomplish in contribution to the project. Our communication skills have improved more compared to the previous sprint. As we are communicating better, each member is aware of the things that must be done and able to do tasks without duplicating the work. Due to the task separation, we progress greatly. Therefore, it gives us more time to find flaws in our project, if any.

What didn't work well this sprint that we should stop doing?

We believe that the sprint went well.

What should we start doing or improve?

We concluded that our work pace is fine, but if we were to pick out something to improve on, we believe that for the presentations to be more successful, we should work faster to better prepare ourselves.
