Sprint 1 Retrospective Summary

What worked well this sprint that we want to continue doing?

Our team members were able to adapt to each other's mindsets, and this resulted in zero arguments. During our first sprint, most of us worked on individual tasks, and this allowed us to progress greatly with tasks.

What didn't work well this sprint that we should stop doing?

For this sprint, there was definitely a lack of communication in the beginning; this may be due to the fact that we are all from different backgrounds. However, as time went by, we conversed more resulting in more ideas being spread and improving our teamwork.

What should we start doing or improve?

We concluded that we should do more work in 2-3 people teams for a single large task. This would allow us to approach tasks with a broader view and give us a chance to discuss openly. With more team engagement, everyone will be more content with the product.
